

HIGH-END HOSPITALITY FOR EVERYDAY USE

*Our Lady of the Lake Regional Medical Center
Baton Rouge, Louisiana*

OBJECTIVE

The doctors' lounge at Our Lady of the Lake Hospital is a place of respite and retreat for the hundreds of physicians who dedicate their lives providing healthcare services to those in need. In addition to dining areas, this lounge provides physician dictation stations and areas where doctors can rest and regroup in the midst of a busy day. Designers for the lounge area wanted to create a high-end hospitality look and feel, incorporating surfaces that were non-porous, scratch resistant and highly durable.

SOLUTION

The designers wanted a color that would blend well with the ebony-toned wood accents and furnishings already chosen for the lounge area. Working in tandem with designers and Medical Center staff, Hanwha Surfaces recommended their **HanStone Quartz** surface product in Hazel Black — a luxurious black surface speckled with rich gold and cream flecks. It was the perfect design solution — achieving the look of high-end hospitality yet functional for everyday use. Hazel Black was used throughout the lounge on dining tables, buffet stations, window sills, wet areas in restrooms and physician dictation stations.

The quartz product was an ideal surface choice for the physicians' lounge area because of its surface properties: durable, heat, bacteria and stain resistant, non-porous and low maintenance. All HanStone Quartz products are also certified by the National Sanitation for Food Safety and Food Contact under the NSF 51 Certification.

“I was looking for a surface that has the high-end aesthetic of natural stone with the anti-microbial properties of a solid surface. HanStone Quartz is the perfect material in the health care setting.”
