

FIRST IMPRESSIONS ARE LASTING IMPRESSIONS

*X-Design, Inc. Office Reception Area
Toronto, Canada*

DESIGN CHALLENGE

When Toronto-based X-Design, Inc. moved into their new office space, they wanted to make a statement. X-Design was looking for an innovative, yet functional, material to design and build a new reception desk – the visual focus of the office to welcome visitors and clients alike. Knowing that first impressions are lasting impressions, X-Design wanted their reception desk to be a reflection of their brand – an artistically-designed centerpiece to showcase their creative design capabilities. The functionality requirements for an efficient work space were important, as long as the final design complemented the modern industrial feel of the office. The goal was to create an immediate feeling of inspiration.

SOLUTION

When X-Design approached Hanwha Surfaces with this project, our teams worked hand-in-hand to create a solution that would appropriately suit their design needs and provide the needed functionality for this work space. Knowing the reception area is a high-traffic area in their office, Hanwha Surfaces designers presented a translucent solid surface material as the perfect solution. **Hanex Solid Surfaces** products are crafted from a unique blend of acrylic resins and natural materials that are scratch and stain resistant, easily maintained, highly durable and environmentally friendly. Designers recommended the Aqueous surface from the Classics Solo series because when backlit with fluorescent lights, the tranquil, translucent, soft blue tone beautifully complements the industrial space while providing the innovative look and feel X-Design was seeking. Hanex Solid Surfaces products are ideal for commercial applications because of their beauty, durability, aesthetics, design flexibility and color choices.
