Hanstone Quartz

HanStone Quartz
by Hanwha Surfaces

 Hanwha L&C | Surfaces

This spring in May, Hanwha Surfaces L&C introduces two new enticing Hanstone Quartz colors. Inspired from the fluidity of nature, Aramis and Tranquility, sets the tone for the highly anticipated 2013 fall product launch.

Aramis, with tones similar to concrete, is effortless, versatile and modern. **Tranquility**, with tones similar to the natural look of marble, is luxurious, serene and refined.

Hanwha Surfaces emphasizes the need for development of colors and patterns, which are trend setting and multi-functional for any residential and commercial design space. HanStone Quartz provides an array of beautiful color designs to suit any contemporary, classic, and sophisticated palette.
