### HanStone Quartz

HanStone's newest designs are making an impact with an innovative combination of color, pattern and texture. These three products prove that HanStone's new designs are making a difference in expanding the use of quartz in commercial and residential applications. Bob Paradiso, VP of Sales and Marketing says "With the introduction of Fusion, Epic and Crimson, HanStone reinforces the design statement made when Tranquility was introduced earlier this year. Such design innovation is why today's architects and designers choose HanStone".

Element Designs' aluminum frame doors are an innovative way to add style and sophistication to your kitchen and bath designs. The custom cabinet doors offer unlimited design possibilities for contemporary, transitional and traditional cabinetry applications. They are available in 10 profiles, 5 frame finishes, 46 standard insert options and custom color backpainted glass inserts. All of Element Designs' products are made to customer specifications in the USA with the highest quality materials.
