## **HanStone Quartz Continues to Diversify Its Product Line, Adding Two New Colors**

*More veining designs join HanStone Quartz's extensive palette of colors*

**ATLANTA, August 4, 2015** -- [Hanwha Surfaces](#), the American subsidiary of South Korea-based Hanwha L&C announced today [HanStone Quartz](#), the company's premier quartz surfaces division, has added two new colors to its product line, including unique veining patterns and colors mirroring the look of Carrara marble. Made from pure, natural quartz, these colors deliver one of the strongest and most durable surface materials on the market, without sacrificing style.

The new colors provide the same combination of stunning beauty and strength that has become the standard, making HanStone Quartz a preferred choice for architects, designers and consumers throughout the world. Non-porous, resistant to heat, stains, and scratches, these designs are the perfect solution for both residential and commercial applications.

The two new colors include:

**Italian Waves:** Tuscan and classic. Proudly infused with rich grey veining, Italian Waves displays gorgeous movement with a glossy sheen.

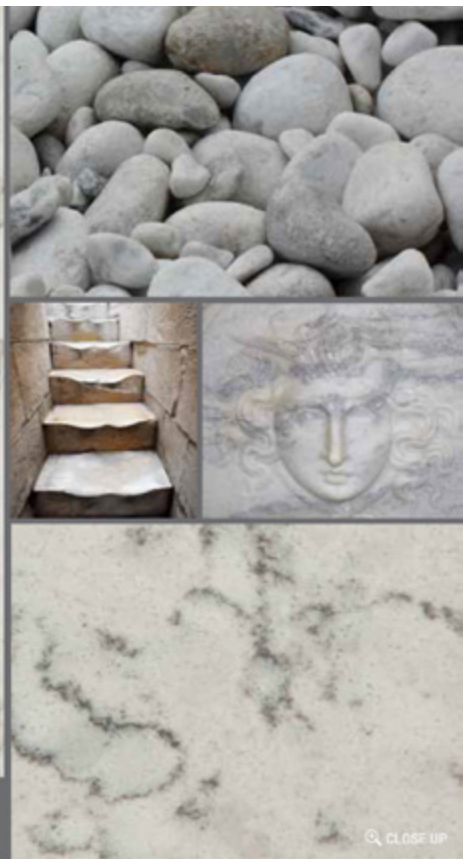

**Classic Statue:** Subtle wispy veining is complemented by distinct contrasting darker-veined undertones within a stone white background and high-gloss sheen.

Today, Hanwha Surfaces delivers the industry's most comprehensive quartz and solid surfaces solutions - with unequalled consistency of color, texture and quality. Unlike competitors, HanStone's innovative approach enables the company to deliver the most consistent quality of product on the market today. All of these qualities have made HanStone Quartz a premier choice for builders throughout the world.
