

Go Greener Event – HanStone Wins!!

Our NY/Leeza Distributor specification rep, Debbie Sulewski, represented our HanStone product line at Spec Simple's, Go Greener Event. The event was held December 4th at the Dauphin Showroom and was an open forum of designers and manufacturers discussing the benefits of quartz sustainability. Out of 6 quartz countertop manufacturers, HanStone tied with one other quartz manufacturer for the top environmentally conscience manufacturer of quartz.

There was a point system set by Spec Simple to qualify manufacturers for most sustainability efforts in the quartz countertop industry. Some of the categories were: Recycled Contents, Transportation Impact, Installation and Fabrication, and Information Accessibility.

HanStone is committed to the environmental wellness efforts that architects and designers see as a priority. Hanwha L&C Surfaces is leading the quartz industry as a greener and highly sought after LEED product, through our environmentally friendly manufacturing processes.
